Summary

Full-stack Software Engineer with hands-on experience building and deploying web applications using **JavaScript, React, Node.js, Express, and MongoDB**. Experienced in developing **RESTful APIs, implementing JWT-based authentication, and integrating third-party APIs** into production-ready applications. Strong understanding of responsive **UI development, backend systems**, and scalable application architecture. Seeking a Junior Software Engineer, Full-Stack Developer, or Frontend Developer role.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React, Tailwind CSS, Responsive UI, Component-based Architecture, UX best practices

Backend: [Node.js](#), Express.js, REST APIs, GraphQL

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Google Cloud, Postman, Webpack

Concepts: Data Structures & Algorithms, Authentication & Authorization, CI/CD, Agile Development

Software Engineering Experience

Nexus Partner Pipeline C7

Software Engineering Extern

Remote

January 2026 - March 2026

- Built responsive and data-driven dashboard features using **React, TypeScript, and Tailwind CSS**
- Integrated frontend with **GraphQL APIs and MySQL** for real-time data
- Collaborated in an **agile team using Jira and GitHub workflows**
- Improved code quality through regular **code reviews**
- Presented completed features and technical solutions to stakeholders
- Designed reusable components and maintained scalable front-end architecture

TripleTen

Remote

Peer Support Tutor (Volunteer)

December 2024 – March 2026

- Mentored students in full-stack development, including **JavaScript, React and backend development**
- Assisted with debugging, project requirements, and implementation of best practices
- Strengthened problem-solving skills by guiding students through real-world coding challenges

Projects

What To Wear - Full Stack Weather Wardrobe Application

<https://www.jumpingcrab.com>

Tech: React, [Node.js](#), Express, MongoDB, JWT

- Developed and deployed a full-stack application that delivers personalized clothing recommendations using real-time weather data
- Designed and implemented **RESTful APIs** for managing users, preferences
- Implemented **JWT-based authentication** with protected routes and secure data handling
- Integrated third-party weather API with robust error handling and asynchronous data processing
- Built a responsive, production-ready UI across desktop and mobile devices

Everything Pokemon- Collection Management Application

<https://pokemon-website-frontend.vercel.app/>

Tech: React, [Node.js](#), Express, MongoDB, JWT

- Built a **full-stack application** allowing users to save and manage Pokemon collections
- Developed **backend services** for storing and retrieving user-specific data using MongoDB
- Implemented **secure authentication and protected API routes** using JWT
- Integrated external API (PokeAPI) and transformed data for efficient frontend use
- Designed scalable API structure separating frontend and backend concerns

News Explorer - FrontEnd News App

<https://news-git-stage-1-frontend-api-agent610s-projects.vercel.app/>

Tech: React, Javascript, HTML, CSS

- Developed a responsive **React application** for searching and saving news articles
- Integrated third-party News API with keyword-based search functionality
- Implemented user authentication flows for saving and managing articles
- Focused on **state management, responsive design, and accessibility**

BreatheWell - Team Project (Code Jam)

Tech: JavaScript, HTML, CSS (BEM), Flexbox

- Collaborated in a team environment to build a mindfulness-focused web application
- Used **VS Code Live Share** for real-time collaboration and efficient teamwork
- Applied BEM methodology to create scalable and maintainable CSS

Professional Experience

Burlington Coat Factory

Danbury, CT

Receiving Associate/Lead

October 2022 – Present

- Coordinated inventory and shipping operations in a fast-paced retail environment
- Trained new employees on procedures and safety standards
- Managed team workflows and contributed to efficient daily operations

Education

TripleTen Software Engineering Program:

Professional Certification

October 2023-July 2025

- Completed 1,000+ hours of hands-on full-stack development training
- Built multiple production-ready applications using **React, Node.js, and modern databases**
- Gained experience with **authentication, deployment, and agile collaboration**
